1. About the Organization

Microsoft enables digital transformation for the era of an intelligent cloud and an intelligent edge. Our mission is to empower every person and every organization on the planet to achieve more.

2. Key Roles & Responsibilities

- Build core microservices and scalable control-plane systems powering Microsoft Azure Cloud.
- Design resilient telemetry, monitoring, and automated incident triage pipelines.
- Ensure adherence to strict enterprise-grade security, identity federation, and privacy protocols.
- Participate actively in design architecture reviews and continuous refactoring initiatives.

3. Technical Requirements & Qualifications

- Demonstrated proficiency in C#, Java, C++, or TypeScript.
- Solid grasp of operating systems, networking fundamentals (TCP/IP, HTTP/2), and distributed caching.
- Experience building RESTful microservices and consuming cloud APIs.
- Excellent collaborative problem-solving skills.

4. Selection & Interview Process

Step 1: Round 1: Online Coding Round (Codility Platform)

Step 2: Round 2: Technical Round I (Problem Solving, Trees, Graphs, Dynamic Programming)

Step 3: Round 3: Technical Round II (Low-Level System Design & Cloud Principles)

Step 4: Round 4: AA (As-Appropriate) Executive Leadership Interview
