1. About the Organization

Adobe is the global leader in digital media and digital marketing solutions. Our creative, marketing, and document solutions empower everyone to bring digital creations to life.

2. Key Roles & Responsibilities

- Develop modern client-side rendering engines using C++, WebAssembly, and modern TypeScript.
- Optimize asset streaming, image/video compression, and rendering performance for web and mobile.
- Collaborate with UX research teams to build fluid interactive user interfaces.
- Participate in open-source standards development and technical publications.

3. Technical Requirements & Qualifications

- Strong knowledge of C++ and Modern JavaScript / TypeScript.
- Deep understanding of memory management, multi-threaded programming, and graphics pipelines.
- Solid mathematical foundation in linear algebra, geometry, and algorithms.
- Familiarity with WebGL, WebGPU, or Canvas rendering APIs is a plus.

4. Selection & Interview Process

- Step 1:** Round 1: Online Coding Challenge (Algorithms & Maths/Geometry)
- Step 2:** Round 2: Technical Interview I (Data Structures & Memory Models)
- Step 3:** Round 3: Technical Interview II (System Architecture & Frameworks)
- Step 4:** Round 4: HR & Cultural Alignment Round
